TACHYON

Most Powerful Electric Tractor In The World

REVOLUTIONISING OFF-ROADING

It is a no-brainer that the fuel tractors vehicles emit excessive levels of emissions and noise in the environment, making the vehicles awfully harmful not just to the environment but also to the ones using them.

That's why we at Powerland, offer electric all-terrain vehicles, a disruptive alternative which gives you the experience that you deserve while ensuring no damage to the environment.

With an overarching aim to shift consumer mindsets and inspire more companies to fundamentally change the way they operate, for a sustainable future, presenting to you Tachyon, one of the most powerful 4x4 electric tractors.

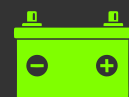

Capable of exceptional acceleration, handling and powerful beyond comprehension, presenting Tachyon. Like a particle that can travel faster than speed of light from which it takes its name, Tachyon is a force like no other. Designed, and engineered in the beautiful state of Goa, India, defined by function and forged from our love for automobiles, Tachyon was born to outperform. And, with that, Powerland's flagship model stands apart from the rest and sets a new bench mark in electric tractors industry.

Experience the ultimate Tachyon today.

Power - The direct-drive hub motors help the vehicle achieve up to 50 hp peak power and 800 nm of torque at wheels.

Minimum noise, maximum efficiency - The direct drive motors, unlike the motors with gearboxes, eliminate transmission humming noise, making Tachyon the quietest.

Save costs - The in-wheel motor technology eliminates the need for numerous mechanical components, thus, helping you save on the maintenance cost by facilitating better handling.

Best control - The hub motors with their regenerative braking technology, not just help you extend your battery range but also act as a hill descent control, giving you better control while riding.

TECHNOLOGY

CONVENIENCE AT YOUR FINGERTIPS

The Bluetooth app using an advanced diagnostic technology helps you keep tabs on vehicle diagnostics, location, remote vehicle health and more.
